

I want the instant traffic info to stay on XM Radio. Although we don't have it here in Seattle yet, it will be very helpful in the future when it does come to Seattle. The "regular" radio (am & fm) do not give the traffic info often enough so drivers can avoid traffic messes. Here is Seattle that is a big issue and by removing the instant traffic from XM radio the FCC will not help taking care of our traffic problems or even make it worse.
